HOBBIES

OBJECTIVE

Disciplined engineer and passionate self-starter with a strong foundation in front-end technologies. Seeking an entry level role as a software engineer to apply quality design and developmental practices, a strong work ethic, and dedication to continued growth in a professional setting.

PROJECTS & EXPERIENCE

Freelance Front-End Web Developer

Political Campaign Website | johnnypecoraro.com

- Multi-page CMS driven website developed in Wordpress to achieve design requirements and desired functionality set by the candidate and board committee.
- ❖ Implemented a user-friendly, responsive design with custom HTML and CSS.
- Utilized Photoshop and vector editing software to create logos and design assets.

Web Applications Developer

Passion Project | ReactWidgets

- Full-stack web application developed in ReactJS.
- Implemented an API backend using Firebase services (BaaS) to perform CRUD operations on user data and persistent state utilizing a NoSQL data structure.
- Applied core React concepts including component reusability, global state management (Context API), page routing (React Router), JSX, props, and hooks.

Passion Project | PokéVM

- Pure JavaScript application featuring dynamically rendered pokémon cards (898) by leveraging asynchronously handled data from RESTful API web services.
- Improved knowledge of coding structure, DOM API, and advanced JS & CSS concepts.

INDUSTRY SKILLS

Languages & Libraries

HTML | CSS | JavaScript | React

Web Technologies

SASS | Firebase (BaaS) | Figma

Version Control System

Git | GitHub

Front-End Tooling Workflows

NPM

EDUCATION

L5U College of Engineering

B.S. In Biological Engineering ABET Accredited | 2019

- Critical Thinking | Analytical Writing | Complex Problem Solving
- * Electrical Engineering | programming microcontrollers (Arduino IDE C++)

Certificates
